Ithaca—Using a special grappling rig that conquered the deadly cross-currents and undertow of the Taughannock Falls pool, rescue workers yesterday recovered the bodies of Mrs. Marshall G. Holloway, 25, and Henry S. Birnbaum, 21, of Brooklyn.

Mrs. Holloway, daughter of Mr. and Mrs. John Schamel of Chemung, and Mr. Birnbaum were drowned Monday attempting to rescue two women floundering in the water, who later were saved by other members of a Cornell physics department picnic party.

Birnbaum's body was recovered about 5 p. m. by State Police, park officials, and a game warden, said H. A. Stover, park superintendent. Mrs. Holloway's body was brought to the surface about 7 o'clock.

Mrs. Holloway, a sister of Dr. John B. Schamel of Waverly, was taken to the Lucerne funeral home there. Birnbaum was brought to Ithaca, where he was a graduate student in physics at Cornell University.

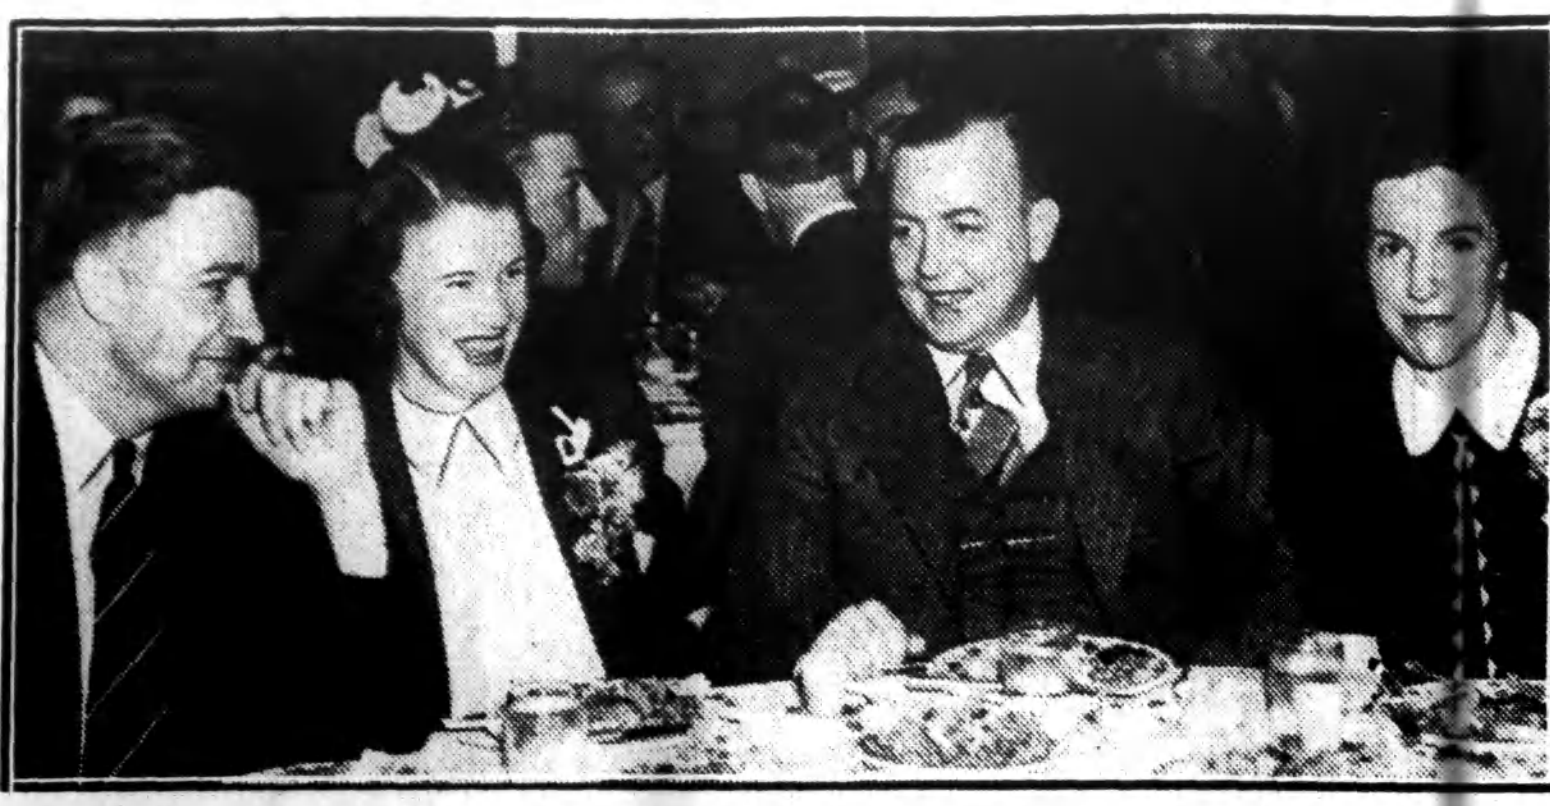

The bodies were found near the north side of the pool basin, near the 215-foot falls, Mr. Stover said. He estimated the pool to be 40 to 75 feet deep and 75 feet across.

Besides himself, the searchers were Serg. John Kelly and Troopers Chaplin and Hausner of the State Police, and Game Warden Frank Regent. The troopers were grappling from a rowboat near the foot of the falls. Stover said, and the others were on the bank.

He said the officers were using a special grappling rig which could throw the bodies into the turbulent water at the foot of the falls and permit them to follow the current.

High water below the falls impeded the search Tuesday, and Stover said that two water rescue experts brought from Buffalo had

# Midget Horses Again Reported In Rockies

Grand Canyon, Ariz.—(UP)—The National Park Service is making an intensive investigation of rumors that a race of midget horses is living in the depths of the Grand Canyon of the Colorado.

The old legend was given new life when Jack Tooker, a railroad engineer, said he discovered two of the midgets — one less than 17 inches tall. Tooker said he had trapped two of the animals in a hidden box canyon with the help of the Hualpi Indians. One of them, a mare was 7 years old weighed about 80 pounds and was 30 inches high. The smaller of the two, a colt about a year old, was 17 inches high and weighed 19 pounds.

The park service announced it would send an expedition into the canyon. However, because Tooker had not produced the horses, they were inclined to be skeptical of the reported capture.

Hualpi Indians and other tribesmen from northern Arizona, hearing of the capture, flocked to the canyon to see living proof of the legendary horses which are part of the mythology of the Indian.

# Peace Forces Call Mobilization Day At Washington

Editor, Star-Gazette:  
Peace forces are organizing for a Peace Mobilization Day on Friday, June 7, in Washington.

"Events in Europe and mounting hysteria of the American people," says the sponsors, "convince us that we must demonstrate at once to the President and Congress of the U. S. our determination to stay out of war. No calamity that may result from the war will be as great as our entry into the war. Stop the drift to war by (1) no further steps, economic or military, toward war; (2) opposition to hysterical armament appropriations; (3) urging that Congress recess rather than adjourn; (4) safeguarding our living standards and democratic institutions."

"Go to Washington June 7. Let those who cannot go flood Washington with letters and telegrams on that day."  
Which do we prefer—an M-Day for peace or an M-Day for war?
